

Press Release

Death of Bobbi Kristina Brown

The death of Bobbi Kristina Brown has been reported to the Fulton County Medical Examiner's Office in accordance with state death investigation laws requiring investigation of known or suspected non-natural deaths. Because the events at her home leading to her death occurred in Fulton County (Roswell), her death has been reported to the Fulton County Medical Examiner for determination of the cause, manner, and circumstances of death. Despite the long interval between her being found unresponsive and her death, an autopsy will still be necessary to further evaluate possible causes of death or contributing factors.

The time which has elapsed between the initial event on January 31st and her resulting death will complicate reconstruction of the events surrounding her initial unresponsiveness. Interpretation of autopsy findings and other information will also be challenging. However, an autopsy could be helpful to address questions which may arise about the cause of her unresponsiveness and eventual death.

No further information will be available from the Fulton County Medical Examiner at this time, and additional lab testing may take several weeks. The Roswell Police Department continues its investigation into the circumstances preceding and surrounding the time of the original incident leading to her death. Media are referred to the Roswell Police Department which will be informed of the medical examiner's progress and findings.

To respect the privacy of the Brown family, and to avoid disruption of medical examiner activities, it is respectfully requested that media do not come to the Fulton County Medical Examiner's Center to obtain information. As information develops, media will be informed through Press Releases on the Fulton County Medical Examiner website at <http://www.fultoncountyga.gov/fcme-press-release> or via the Roswell Police Department.
